DETAILS

The P238 HD is just a fraction of the size of our full-size pistols. A smart looking, small handgun built with the same accuracy and reliability as large frame SIG SAUER pistols. With an overall length of just 5.5 inches a height of 3.96 inches, the SIG SAUER P238 is the ultimate firepower in an all metal frame concealed pistol. The P238 HD is built on an all stainless beavertail style frame with black G-10 grips.

BEST CCW Firearm Ever!!

I bought this to try out as a new primary conceal. I am soo stoked with this firearm! It is a great size, shoots amazing and small enough to put wherever. Best thing is that it is CA compliant.

Rounds 250-500

Wife loves it

Upon delivery I dismantled and cleaned all packing oil off. After reassembly and during function check I noted that any time slide was racked with right hand palm down the Slide stop fell out (Note Jon's previous review 6 mo ago). After several more wipedowns to remove oil missed the first times, I felt nervous but we went to the range. Several brands and several rounds later with no faults at all we went home. Slide stop now works perfectly as designed. Wife very happy with her shot patterns and now with Crimson Trace laser attached is confident that this .380 is her favorite

Love it!!!!

I bought this a couple months ago and absolutely love it! Haven't had one issue at all. Is very accurate and fun to shoot and love that it's just like a mini version of my 1911. Love how small and compact it is and much easier to conceal (this is my ccw). Very happy with my purchase and look forward to purchasing more from Sig Sauer.

Great

Fired 300 rounds so far with no problems. I will fire 500 before using as a CCW firearm. I was concerned about the lack of power of a 380, but with name brand HP ammunition I get more than 12" of penetration in water filled milk jugs. This might replace my Glock 36 because it is so easy to carry.

P238 An awesome carry gun

Love it. Very accurate in a small package. Put rosewood grips on it and it looks gorgeous.

Sig Sauer?

I just got this yesterday together Sig branded ammo. I have a number Sig Sauer pistols and rifles. All of them have functioned flawlessly, no misfires or any failures. This is the first Sig pistol I ever had any failure. I shot 150 rounds

Accuracy

Trigger

Ergonomics

of Sig branded Ammo-4 times it failed to load/eject. It is nice looking pistol but it does not live up to Sig standards. Maybe because its new or because it's the California version? If I can return this \$800 firearm, I would.
